

Strong function types

(Weak) function type

```
$ integer() -> integer()  
def id_weak(x), do: x
```

PROPAGATION OF *dynamic()* !

x_dyn of type *dynamic()*

```
id_weak(x_dyn)  
# type dynamic()
```

```
id_strong(x_dyn)  
# type integer() and dynamic()
```

Strong function type (by the programmer)

```
$ integer() -> integer()  
def id_strong(x) when is_integer(x), do: x
```

Strong function type (by the VM)

```
$ integer() -> integer()  
def double(x), do: x + x
```
