

Narrowing: inferring more precise types

```
$ type result() =  
  %{output: :ok, socket: socket()} or  
  %{output: :error, message: :timeout or {:delay, integer()}}
```

Automatically infer a return type

```
$ result() -> _  
def handle(r) when r.output == :ok, do: {:accepted, r.socket}  
def handle(r) when is_atom(r.message), do: r.message  
def handle(r), do: {:retry, elem(r.message, 1)}  
#=> Return type: {:accept, socket()} or :timeout or {:retry, integer()}
```

has_type {:~~delay~~, integer()}
